Bob-O-Link

from crop

Fazenda Ambiental Fortaleza is a farming group of 7 small lot farmers. Their agricultural methods maintain a harmony with nature by creating a healthy balance of shade and rich chemical-free soil that respects the habitats of animals and keeps the waterways clean. Their coffee is named for the Bob-O-Link bird that migrates between their region of Brazil and our region of America.

Roaster Direct To Farm Purchasing ensures a higher standard of living for the farmers by paying above established fair trade price levels. As these are long term, multi-year, relationships a continuous feedback cycle is created between farmer, roaster and consumer.
